At the winter market, Cindy Lou is browsing the clothing inventory and wants to find all items with "sweater" in their name....

Question 1: At the winter market, Cindy Lou is browsing the clothing inventory and wants to find all items with "sweater" in their name. But the challenge is the color and item columns have inconsistent capitalization. Can you write a query to return only the sweater names and their cleaned-up colors.

```
select upper(item_name) as SWEATER_ITEM_NAMES,  
       UPPER(COLOR)as SWEATER_COLOR  
  from winter_clothing  
 where upper(item_name) like '%SWEATER%' ;
```
