As the New Year begins, the goals tracker team wants to understand how user types differ....

Question 1: As the New Year begins, the goals tracker team wants to understand how user types differ. How many completed goals does the average user have in each user_type?

```
SELECT
    user_type,
    AVG(completed_goals) AS avg_completed_goals_per_user
FROM (
    SELECT
        user_id,
        user_type,
        COUNT(*) AS completed_goals
    FROM user_goals
    WHERE goal_status = 'Completed'
    GROUP BY user_id, user_type
) AS per_user
GROUP BY user_type;
```
