The Snow Queen hosts nightly fireside chats and records how many stories she tells each evening....

Question 1: The Snow Queen hosts nightly fireside chats and records how many stories she tells each evening. Can you calculate the running total of stories she has shared over time, in the order they were told?

```
SELECT  
    sum(stories_shared) over(order by log_date) total_of_stories  
FROM  
story_log;
```
