The Grinch has brainstormed a ton of pranks for Whoville, but he only wants to keep the top prank per target, with the highest evilness score....

Question 1: The Grinch has brainstormed a ton of pranks for Whoville, but he only wants to keep the top prank per target, with the highest evilness score. Return the most evil prank for each target. If two pranks have the same evilness, the more recently brainstormed wins.

```
with rank_prank as(
select
prank_description,target_name,evilness_score,
row_number() over(partition by
target_name order by evilness_score desc,created_at desc)prank_rank
FROM
grinch_prank_ideas)
SELECT
prank_description,target_name,evilness_score
from rank_prank
where prank_rank=1;
```
